

# **Solar power station in China in Sao-Paulo**

## Overview

---

What is Panati photovoltaic power station?

The Panati Photovoltaic Power Station in Brazil, invested and led by the Brazilian branch of China State Power Investment Corporation (SPIC), was officially put into operation on June 19. The power station has an installed capacity of 292 megawatts and can provide clean energy for more than 350,000 local households every year.

Is Sao Simao the largest renewable asset in Brazil?

The first major project was securing the right to operate the Sao Simao Hydroelectric Power Plant for 30 years, she said. It remains the company's largest renewable asset in Brazil to date.

How much will Brazil's new power plant cost in 2029?

"With an investment of 20 billion reais (\$3.4 billion), the project will supply 5 million kilowatts of power to regions including the capital Brasilia and is scheduled to be put into operation in 2029," said Wang Xiaogang, chief technical officer at State Grid Brazil Holding.

When did SPIC start building a power plant in Brazil?

The plant began construction in December 2022 and achieved successful power transmission on December 1, 2023, meeting the conditions for grid-connected power generation. Lin Guixiang, Chairman of SPIC Brazil, said at the commissioning ceremony that SPIC has always been committed to promoting green, innovative and integrated development.
