

# **Solar power storage batteries in Italy**

## Overview

---

Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

Why is energy storage important in Italy?

As electricity prices continue to rise and Italy accelerates its shift toward renewable energy, reliable and efficient energy storage has become essential for both homeowners and businesses.

How is Italy transforming its energy system?

Italy, like much of Europe, is undergoing a rapid transformation in how it generates and distributes energy. With solar PV and wind power ramping up quickly, grid operators are increasingly reliant on energy storage systems to manage variability and avoid curtailment of renewable energy during periods of oversupply.

Is battery storage the future of energy?

And for Europe at large, they offer a compelling case study in how battery storage is no longer an option, but an essential component of the energy future. Italy has approved 361 MW of battery energy storage systems to support renewable energy and grid stability across Lazio, Puglia, and Sardinia.

## Solar power storage batteries in Italy
