Solar power walk-in energy storage

Overview

What is the PV exhibition area & energy storage area?

The PV exhibition area includes silicon materials and wafers, cells and modules, inverters, mounting systems, and PV application products, while the energy storage area covers battery materials, cells and modules, storage system integration, BMS/PCS, charging stations, and smart energy management systems.

Why did energy storage prices decline in 2025?

In 2025, price declines for energy storage cells and system integration have continued due to sharp drops in upstream material costs and market oversupply. In Q2, demand recovery from some non-China markets has helped stabilize cell prices in China, with some formats seeing slight rebounds. 1.

Which companies are exhibiting in the energy storage industry?

Notably, energy storage took center stage, with a sharp increase in exhibitors and larger booth footprints. Nearly all inverter manufacturers showcased energy storage products and solutions while leading PV module makers—including Trina, Jinko, and JA Solar —highlighted their expanded presence in the energy storage sector.
