

# **Solar power with grid backup in Durban**

## Overview

---

Our residential solar system installations include grid-tied solar systems, also known as grid-connected or grid-interactive solar systems, are solar power systems that are connected to the electrical grid.

Who is Durban solar power?

At Durban Solar Power, we specialize in the design and installation of solar panel systems for homes and businesses throughout South Africa. We understand that making the switch to clean, renewable energy can be a big decision, which is why we're here to guide you every step of the way.

Where can I install a solar system in Durban & KwaZulu Natal?

Durban Solar Power offers residential solar system installations to homes throughout Durban and KwaZulu Natal. Contact us for a free quote!.

Are solar panels and inverters a good option for Durban residents?

Together, solar panels and inverters form a complete system that allows you to tap into renewable energy. For residents in Durban and throughout South Africa, load shedding can disrupt your daily schedule and cause added inconvenience.

What is a battery backup for a residential solar system?

Battery backups for a residential solar system are devices that store electricity generated by the solar panels for use when the sun is not shining or when the grid is down. They are designed to work in conjunction with residential solar panel systems and allow homeowners to have access to electricity even during power outages or load shedding.
