

# **Southeast Europe Foldable Container 40kWh**

## Overview

---

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.

How big is a 20 foot shipping container?

Background Note: Standard shipping containers for 20-foot shipping size are approximately 6.06 m in length and 2.59 m in width, offering a standard form for retrofitting photovoltaic systems. Why Folding Photovoltaic Containers?

Foldable solar containers merge two mature technologies: lightweight foldable solar panels and ISO shipping containers.

What is a foldable solar container?

Foldable solar containers merge two mature technologies: lightweight foldable solar panels and ISO shipping containers. The systems, CDS Solar states, are standard containers with inverters, controllers, batteries, and hinged panel arrays built into them, which open while in use and fold up into a compact form to ship.

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.
