Information unavailable.

What is an uninterrupted power supply (UPS)?

An uninterrupted, or uninterruptible power supply (UPS) works as a battery, surge protector and power inverter for household and office electronics. The battery inverter allows stored energy to be used for power, while the surge protector prevents any damage from a sudden surge in the power level.

How long does a UPS battery last?

A UPS battery can provide backup power from anywhere between two and 20 minutes or longer, depending on the number of devices connected and the amount of load on the computer's CPU. A battery for UPS allows users to save data, files and any other information before safely powering down equipment in the event of power loss.

What is the power supply industry in Spain?

With a focus on reliability and energy efficiency, their products range from 350 VA to 6,400 KVA, making them suitable for various sectors such as healthcare, IT, and large infrastructures. When exploring the Power Supply industry in Spain, several key considerations come into play.
