# Specifications and dimensions of solar panels exported from South Sudan

## Overview

---

Does South Sudan have a country Factsheet?

Specifically for South Sudan, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

What data formats are used in a solar system?

Solar resource (GHI, DNI, DIF, GTI, OPTA), PV power potential (PVOUT) and other parameters are provided in the form of raster (gridded) data in two formats: GeoTIFF and AAIGRID (Esri ASCII Grid). Provided data layers are in a geographic spatial reference (EPSG:4326).

What is a solar resource database?

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.
