Are large battery parks on the rise in Sweden?

In addition to the great interest in residential battery installations, large battery parks are also on the rise in Sweden. Svensk Solenergi estimates that the capacity of commercial batteries and large-scale battery parks will increase fivefold from 200 MW in 2023 to more than 1,000 MW by the end of 2024. (hcn).

Where is Axpo battery storage located?

Axpo commissioned its first large-scale battery storage facility in Sweden. It was connected to the grid in Landskrona, in the south of the country. The 20MW/20MWh plant, connected to the electricity grid by local energy company Landskrona Energi, follows several projects in Switzerland and Europe.

What happened to solar power in Sweden in 2024?

The expansion of PV systems in Sweden slowed in 2024 compared to the previous year. At the same time, investment in battery storage increased significantly. 2023 was an extreme year for solar power in Sweden, with a turbulent European energy crisis creating a unique interest in PV. In 2024, installations returned to the level of 2022.

What is a battery storage system?

Battery storage systems as platform solutions ADS-TEC Energy is developing battery-based platform solutions for the energy industry of the future. They are designed to optimize internal consumption and peak load capping, providing backup power when needed, and supplying primary regulating power.
