

# Storage and control integrated solar container lithium battery solar energy

## Overview

---

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

What is solar energy storage?

An intelligent comprehensive energy solution, which realizes the reasonable cooperation between wind, solar, energy storage battery, power grid, and diesel generator, makes scientific use of all kinds of mobile energy storage and provides users with green, low-cost, convenient, and high-quality power services.

Why did SCU provide a 40ft energy storage container?

SCU provided a 40ft energy storage container to a village in the Niger desert in Africa to form a large scale off-grid solar battery storage solution to help the village solve its long-term electricity difficulties, provide the village with a reliable power supply, and bring benefits to the lives of residents.

What are the benefits of solar energy storage devices?

Solar energy storage devices improve power factor, reduce voltage and current harmonics, adjust three-phase imbalance. Serially designed PCS and battery pack eliminates circulating current and improves grid connected renewable energy system reliability. Integrated BMS, DC, AC multi-layer protection, maximum safety performance design.
