

Supercapacitor price in Bangkok

Overview

What is a super capacitor?

Super capacitor, also known as electrochemical capacitors, electric double layer capacitors, gold capacitors, and farad capacitors, are electrochemical components that have been developed by polarized electrolytes since the 1970s and 1980s.

What are the future applications of ultracapacitors?

As a powerful alternative energy resource, ultracapacitors are widely used in different industrial fields, such as smart meter, electronics, power grid and so on. The future applications of supercapacitor looks brilliant. Kamcap has high-quality ultracapacitors for sale.

What are the characteristics of ultracapacitors?

Ultracapacitors release energy quickly at peak times, then store it quickly and capture excess energy. Ultracapacitors not only have the characteristics of fast charge and discharge of capacitor, but also has the characteristics of energy storage of battery. High power density: up to $10^2 \sim 10^4$ W/kg.
