

LLSE CONTAINERS

Supplier of 40-foot solar-powered containers for farms

Overview

What can HC grow in a shipping container farm?

HC offers standard 40ft and 20ft shipping container farms, as well as smaller hydroponic containers such as hydroponic cabinets, grow boxes, etc., or more custom sizes. You can produce green fodders, strawberries, lettuce, mushrooms, weeds, herbs, microgreens, or most vegetables such as tomatoes by installing different hydroponic planting systems.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

Can a hydroponic farm be powered by a solar panel?

We can also install industry-leading solar panel technology (optional), so your farm can be powered in some of the most remote environments on Earth. Our patented vertical hydroponic system allows people to cultivate highly nutritious food on small plots of land, with less labor and maintenance than traditional methods.

What is a 20 & 40 ft shipping container?

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank. Fully customizable to your exact needs. The durable container design is completely waterproof, protects you and your equipment from the elements and any potential security threats.
