

Sweden installs solar air conditioning

Overview

Is Sweden a leader in solar energy innovation & infrastructure?

One of the standout developments in 2024 was the initiation of a 14 MW rooftop solar project on Sweden's largest depository. This project, the largest rooftop solar initiative in the Nordics, further cements Sweden's position as a leader in solar energy innovation and infrastructure.

How many solar panels will Sweden install in 2025?

Sweden installed 430 MW of solar in the first half of 2025, with industry group Svensk Solenergi noting slower growth than last year but rising interest in battery storage driven by green tax deductions for households.

Does Sweden have a solar industry?

Sweden's solar industry continues to evolve, though at a slower pace in 2024. According to Svensk Solenergi, the nation established an additional 460 MW of solar infrastructure within the first half of the year. This marks a notable decrease from 2023's remarkable engagement of 1.6 GW of photovoltaic (PV) power.

How many solar installations did Sweden have in 2024?

By July 2024, Sweden had connected 27,500 new solar installations, slightly surpassing the 26,600 projects from the same period in 2023 but falling well short of 2022's 66,000 installations. The slowdown in 2024 was anticipated, with Svensk Solenergi attributing 2023's boom to high electricity prices and global uncertainty.
