

# Swedish solar modules

## Overview

---

Who makes swemodule solar modules?

Solar Modules produced at SweModule by Renewable Sun Energy Sweden AB are designed for various markets and applications. High quality production, combined with strictest process control, ensure maximum lifespan and the highest performance. Next generation goes of grid. Read about the fully solar-panel driven Villa.

When will a 200MW solar cell plant be built in Sweden?

Image: Midsummer Swedish solar manufacturer Midsummer has selected the municipality of Flen in central Sweden to build a 200MW thin-film solar cell manufacturing facility. The company will take over the premises in September this year, and expects to begin production in 2026, before scaling up to full production capacity in 2028.

Where are solar modules made?

It's one of the most modern and automated module production facility in Europe Solar Modules produced at SweModule by Renewable Sun Energy Sweden AB are designed for various markets and applications. High quality production, combined with strictest process control, ensure maximum lifespan and the highest performance. Next generation goes of grid.

Will a 1.2 GW module factory be built in Sweden?

Sweden-based Nordcell Group announced plans to build a 1.2 GW module factory in its home country. With a site decision coming soon, module production is planned to start in the first half of 2025. Sweden's Nordcell Group, founded in 2023, has announced plans for 1.2 GW module manufacturing facility to be located in northern Sweden.
