

# **Swiss double-glass solar curtain wall manufacturer**

## Overview

---

What is PV IGU curtain wall system?

PV IGU Curtain Wall System manufacturing with double or tripple glazed units for BIPV solar facade integration.

Who is SolarWall?

Solarwall remains by your side during the building stage : we are experts in structural physics and energy, in façade and metal construction and in the installation of photovoltaic systems and their electrical components. We are here to support you when it comes to installing and assembling your photovoltaic panels.

What is a multilayer glass structure with integrated solar modules?

The multilayer glass structures with integrated solar modules can be used to provide all-in-one thermal insulation and power generation for Skylight, Curtain-wall or other applications. PV modules are integrated into Double or Triple Glass Units or used as a second-skin for front cladding of a facade.

What is a solar insulated glass unit?

Solar-insulated glass units that Metsolar produces can vary in composition, size, fixing options, and light transmittance. Adjustments are based on the specific project requirements to meet the regulatory environment of installation. IGU with embedded solar cells can be used for both façades (curtain walls) or roofs (skylights).
