

Tajikistan energy storage charging pile operation subsidy

Overview

Can Tajikistan's solar power be harnessed to meet energy-policy goals?

In addition to hydropower, Tajikistan's significant solar power potential could be harnessed to meet several energy-policy goals simultaneously, and the government has recently set a target for renewable energy to provide 10% of generating capacity by 2030.

Why should Tajikistan invest in hydropower?

Tajikistan's geographic proximity to some of the world's fastest-growing energy markets means that investing in developing its hydropower potential can contribute to regional energy security and the clean energy transition, in addition to addressing Tajikistan's high vulnerability to climate change and natural disasters.

Will hydropower slow down Tajikistan's demand for coal?

Nevertheless, recent hydropower developments, notably the Rogun HPP project, would slow down Tajikistan's demand for coal. Thus, to ensure a just transition in energy and safeguard the livelihoods of those involved in Tajikistan's coal industry, alternative livelihood avenues must be established.

Are energy tariffs subsidized in Tajikistan?

Energy Tariffs, notably electricity and heating tariffs, are subsidized in Tajikistan to alleviate poverty. Indeed, nearly 50% of families in Tajikistan live below the poverty line. Yet, tariffs have also been subsidized for large industrial consumers such as the aluminum producer TALCO and for the agricultural sector.
