

# **Tanzania energy storage power station subsidy 300**

## Overview

---

What is the energy sector like in Tanzania?

The Energy sector in Tanzania began decades ago, laying a foundation for what has now become a robust and transformative sector.

How many MW does Tanzania have?

Starting with Hydro power Plant producing just 21 MW in 1967 and expanding to significant projects including Julius Nyerere Hydropower Project producing 2,115 MW to reach total installed capacity of 3,404.20MW as at January, 2025. Tanzania continues to make significant progress in connecting citizens to electricity.

How many villages in Tanzania will be able to access electricity?

electricity access for 37 villages in Tanzania along the transmission line. Project comprises of 1) Construction of 49.5 MW hydropower plant, 2) 132 kV transmission line, 54 km long for power evacuation to the national grid, and 3) Distribution network expansion including rural electrification and last-mile connections.

How will Tanzania's energy mix change in 2023?

14.9 percent from the peak in 2023. Given expected demand growth of 5 to 10 percent per annum, Tanzania aims to further diversify its power mix by adding 2,463 MW of generation capacity from solar PV, wind, natural gas, and geothermal resources by 2030, as presented in the recently completed National Renewable Energy Strategy and Roadmap<sup>7</sup>.
