## Overview

What is a 20 ft air cooled ESS container?

The 20-ft air-cooled ESS container product integrates PACK, BMS, PCS, EMS, HVAC and fire safety system in one container which has advantages. In order to meet the design requirements of modularity, integration, and convenience in large-scale energy storage power station.

What is Power Conversion System (PCS) and Energy Management System (EMS)?

Power Conversion System (PCS): Think of the PCS as the translator. It converts electricity between alternating current (AC) and direct current (DC), facilitating the charging and discharging of the battery. Energy Management System (EMS): The EMS is the brain of the operation.

What is Energy Management System (EMS)?

The Energy Management System (EMS) plays a crucial role in the effective operation and management of Battery Energy Storage Systems (BESS). By providing centralized monitoring and intelligent control, EMS optimizes BESS functionality, ensuring efficient energy storage and distribution.

What are the modes of energy storage BMS?

The energy storage BMS solution supports two modes: a three-level architecture (BMU sub-control module + BCU main control module + BSU master control module). The ECO-EMS series of products is an integrated energy management system designed for energy storage application scenarios.
