

Tripoli backup ups uninterruptible power supply

Overview

Are battery-backed uninterruptible power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptible power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) keeps your essential devices temporarily online, which provides a window for you to hit send on that last-minute email. While a standard power strip or surge protector offers sufficient, albeit basic, protection, a UPS ensures devices are properly shut down and are protected from data loss.

Why is an uninterruptible power supply necessary?

An uninterruptible power supply (Uninterruptible Power Supply or UPS) has become a necessity rather than a choice in various sectors of life, including industrial facilities, hospitals, homes, and offices. The electrical network may experience situations such as high or low voltage, sudden voltage jumps, or frequency changes.

Which APC UPS battery backup surge protector is right for You?

For those seeking a budget-friendly option, the APC UPS Battery Backup Surge Protector BE425M offers fantastic value without compromising on essential features. With a 425VA/225W capacity, it provides enough power to safely shut down computers and small electronics during outages.
