UK outdoor power prices

Overview

How much has UK electricity decreased since 2025?

UK Electricity decreased 23.05 GBP/MWh or 22.50% since the beginning of 2025, according to the latest spot benchmarks offered by sellers to buyers priced in megawatt hour (MWh). This page includes a chart with historical data for the United Kingdom Electricity Price.

When did the UK electricity price reach an all-time high?

Historically, the United Kingdom Electricity Price reached an all time high of 580.55 in September of 2022. Electricity prices displayed in Trading Economics are based on spot benchmarks offered by sellers to buyers priced in megawatts per hour (MWh) in the local currency.

What are domestic energy price statistics?

These domestic energy price statistics focus on the average prices paid by households for their energy (predominantly gas and electricity) and the methods they use to pay for it. We present regional customer number proportions to illustrate the state of the UK domestic energy market. They provide data on::

What is the main energy source in the UK?

Despite its significant fall in 1986, oil and gas extraction has been the major energy contributor to the UK economy (with its value dependent both on production and the price of oil and gas). However, since 2014 electricity has become the major energy contributor.
