Overview

What is an uninterruptible power supply?

Uninterruptible power supplies provide power to critical loads in the event of a power failure. Unlike emergency generators, UPS systems provide power immediately, but only for a short period of a few minutes – until a backup power supply comes online or until the load completes its shutdown sequence.

Are battery-backed uninterruptable power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptable power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

What is a three-phase online modular uninterruptible power supply system?

Three-Phase online modular uninterruptible power supply systems from the Modulon UPS family offer scalability and redundancy in a single frame, with up to 600 kVA. Delta's UPSs are some of the most advanced in the industry, renowned for their innovation, reliability, and efficiency.
