

Uninterruptible power supply equipment for Beirut Hospital

Overview

Why do hospitals need an uninterruptible power supply (UPS)?

That's why we're proud to offer our uninterruptible power supply (UPS). Our UPS provides an uninterrupted power supply to hospitals and other medical facilities, protecting critical equipment, data, and personnel since 2001 for over 500 projects. With our UPS, hospitals can rest easy knowing that their power source is secure and dependable.

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supplies (UPSs) are often used as a power protection solution in medical facilities, as they provide a reliable backup power source in the event of a power outage. They ensure that critical equipment remains operational and continue providing power to the system to ensure a safe and smooth transition to backup power.

What is ups for medical centers & hospitals?

UPS for medical centers and hospitals deliver backup power in emergencies and ensure power conditioning for critical equipment. Learn more.

What types of medical equipment require uninterrupted power supply?

Radiology: Radiology equipment such as CT Scanners, MRI machines, and X-Ray machines require uninterrupted power supply to prevent any loss of data.
Hemodialysis Center/Room: Hemodialysis is a medical procedure that is used to remove waste and excess fluid from the blood of patients with kidney failure.
