

# **Uninterruptible power supply factory serial number**

## Overview

---

What is UPS (uninterruptible power system)?

UPS (Uninterruptible Power System), that is, uninterruptible power supply, is a constant voltage and constant frequency uninterruptible power supply with energy storage devices and inverters as the main component.

What is an uninterruptible power supply?

An uninterruptible power supply is an electrical apparatus designed to furnish emergency power even when other sources of input power fail, and they are indispensable tools within a huge number of unrelated industries.

What is int power ups?

INVT Power UPS products range from 1kVA to 600kVA and various UPS accessories as an option, and now we can also offer precision cooling systems, and integrated modular data center solutions for customers, which meet your different requirements in different application scenarios.

How do I enable/disable the 1609-d ups?

The Power Button on the front of the UPS is used to manually enable or disable the output of the 1609-D UPS. To enable the 1609-D UPS, press and hold the power button until one beep is heard. To disable the 1609-D UPS, press and hold the power button until three beeps are heard, then release immediately (takes approximately three seconds).
