

# Uninterruptible power supply label

## Overview

---

What are Uninterruptible Power Supplies (UPS)?

Uninterruptible power supplies (UPS) are devices that allow machines to keep their field power supplies, programmable logic controllers (PLCs), and communications devices functioning during an unexpected outage. They offer a means of achieving this.

How do I know if my ups is uninterruptible?

All have black print on a yellow background (matt on the smaller size, gloss on the larger size), incorporate the general heading “Uninterruptible power supply UPS” and the standard high voltage warning icon, plus the following additional legend:.

How do I choose an uninterruptible power supply?

To select the right uninterruptible power supply (UPS), calculate the average power required for all connected appliances. For instance, a 350-500 VA capacity is suitable for an LCD monitor or a regular PC.

Are electrical warning labels suitable for external use?

Printed on a durable non-rip permanent vinyl material, our Electrical Warning Labels are suitable for both internal and external use. Clearly indicate potential electrical hazards with our Electrical Safety Labels, supplied in handy resealable packs for ease of use and transportation.
