Uninterruptible power supply module price

Overview

What are industrial uninterruptible power supply systems (UPS systems)?

We cater to multiple sectors for industrial uninterruptible power supply systems (UPS Systems) through standard or customized solutions. From high amperage manufacturing processes to minuscule backup requirements, these systems can offer efficiency in every application.

Why do you need an uninterruptible power supply (UPS)?

By fitting your important devices with the uninterruptible power supply (UPS) from Wieland Electric, you can protect them not only from power outages but also from temporary undervoltage and overvoltage. With the matching redundancy modules you will be able to maximize the availability of paralleled power supplies.

What is int power ups?

INVT Power UPS products range from 1kVA to 600kVA and various UPS accessories as an option, and now we can also offer precision cooling systems, and integrated modular data center solutions for customers, which meet your different requirements in different application scenarios.

What is a good power supply capacity?

Capacity ranges from 10kVA-500kVA. From small load sites to processing industries to large data centers, the products operate stably. The series is cost-effective, and the quality is trustworthy. Capacity covers 1kVA-40kVA and provides uninterruptible power supply protection for small applications, like home, small business, office.
