

Uruguay greenhouse solar power generation energy storage pump

Overview

What percentage of Uruguay's electricity is renewable?

Renewables accounted for 99% of Uruguay's electricity generation in 2024, according to preliminary energy balance data published by the country's ministry of industry, energy and mining on Friday. Cardal transmission line in Uruguay. Image by Invenergy (invenergy.com).

Should Uruguay use nuclear or solar power?

Both nuclear and solar power offer reliable, scalable options to complement current energy sources, reduce dependency on external factors like rainfall or fuel supply, and strengthen Uruguay's green energy infrastructure. Uruguay's journey with low-carbon electricity has seen significant developments over the decades, particularly in hydropower.

When will Uruguay's energy balance be released?

Uruguay's full national energy balance for 2024 will be released in mid-year. Renewables accounted for 99% of Uruguay's electricity generation in 2024, according to preliminary energy balance data published by the country's ministry of industry, energy and mining on Friday.

Should Uruguay transition to renewables?

Since 2019, energy has become a significant export for Uruguay, with some years bringing in hundreds of millions of dollars in revenue. In most of the world, when anyone mentions the need to transition to renewables, climate change dominates the public discussion.
