

Usb c power station in China in Angola

Overview

What type of plug does Angola use?

Angola uses a standard voltage of 220 volts and a frequency of 50 Hz. The country uses plug type C, which has two round pins. This plug type is commonly found in Europe and many other parts of the world. If you are traveling to Angola with electronic devices that use different plug types, you will need to bring a travel adapter.

Do I need a travel adapter in Angola?

If you are traveling to Angola with electronic devices that use different plug types, you will need to bring a travel adapter. It is important to ensure that the adapter you purchase is compatible with both the plug type used in Angola and the plug type used by your device. You can find travel adapters at most electronics stores or online.

How many volts does Angola use?

Angola uses 220 volts and 50Hz electricity, different from the US standard of 120 volts and 60Hz. You'll need a voltage converter and a plug adapter to use your US appliances in Angola. Check the voltage and frequency requirements of your specific devices before purchasing a converter.

Do I need a voltage converter in Angola?

The voltage used in Angola is 220 volts, which is different from the standard voltage in some countries. If you are traveling from a country with a different standard voltage, you will need a voltage converter to use your electronic devices safely in Angola. However, it is important to note that a voltage converter alone may not be enough.
