

Victoria Solar Storage Container 100kW Discount

Overview

Can a business use a solar PV system with a battery?

By combining solar PV systems with batteries, businesses can generate and store their own energy and further reduce energy costs. Under the Cheaper Home Batteries Program businesses may be eligible for around a 30% discount on the upfront cost of installing a small-scale solar battery.

How big should a solar PV system be?

The solar PV system you install must be between 30 kilowatts (kW) to 200 kW in size. The size of the solar PV system is the total power-generating capacity of all the solar panels. Please note, you may also be eligible to claim other incentives for your solar PV system in addition to any VEU program discount.

Who can apply for a solar PV discount?

All Victorian businesses and non-residential sites, such as community buildings, schools and hospitals, are eligible to apply for discounts to install a solar PV system. Systems must be installed through an accredited provider. The solar PV system you install must be between 30 kilowatts (kW) to 200 kW in size.

Are solar batteries eligible for a discount?

Under the program, solar batteries with a capacity up to 100 kWh are eligible discounts when installed with new or existing solar PV systems less than 100 kW. Visit Cheaper Home Batteries Program for more information.
