

What are the new energy base stations in Riga

Overview

Who manages the electricity grid in Latvia?

The electricity grid in Latvia, however, is primarily managed by Sadales tīkls, the largest distribution system operator that serves 99% of the country's territory. Both public and private energy companies, such as AST and Latvenergo, participate in the sector.

What's going on in Riga?

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production and storage of renewable electricity, and the development of hydrogen and alternative fuel technologies.

What is Latvia's energy system?

Latvia's energy system is largely based on renewable resources, primarily hydropower from the Daugava River, supplemented by wind, solar, and biomass. While natural gas imports cover energy shortages, the country aims to increase wind and solar energy capacity, with significant progress already made in 2022.

Will a Solar Park transform Riga into green energy?

Home Port News Major solar park set to transform port of Riga into green energy. On 9 September, an agreement was signed between the Freeport of Riga Authority and Lithuanian company SNG Solar for the lease of land in the Spilve Meadows area of the Latvian port.
