

# **What are the safe outdoor power supplies in Estonia**

## Overview

---

Do I need a power adapter in Estonia?

Even if the voltage in your home country is the same as in Estonia, you may still need a power adapter. This is because the shape of the electrical outlets in Estonia is different from the shape of the outlets in many other countries. A power adapter will allow you to plug your devices into the Estonian outlets.

What type of plugs are used in Estonia?

The power plugs and outlets used in Estonia are types type C and F plugs. Type C plug has two round pins. The type F plug has two round pins with two earth clips on each side. What is the voltage and frequency in Estonia?

The standard voltage in Estonia is 230 V, and the frequency is 50 Hz.

Are the power outlets and plugs in Estonia the same?

However, the power outlets and plugs in Estonia are not the same as those found in many other countries. It is important to bring a power adapter that is compatible with the Estonian power system to avoid damaging your electronic devices.

What is the voltage in Estonia?

Just like the rest of Europe, the voltage in Estonia is 230 volts and the frequency is 50 Hz. Estonia has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.
