

# What does base station backup power mean

## Overview

---

What is a battery backup power station?

A battery backup power station is the perfect disaster prep solution, ensuring that you always have access to electricity and the ability to keep your devices charged. Goal Zero offers a wide variety of options to meet your needs.

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

Why is backup power important in a 5G base station?

With the rapid expansion of 5G networks and the continuous upgrade of global communication infrastructure, the reliability and stability of telecom base stations have become critical. As the core nodes of communication networks, the performance of a base station's backup power system directly impacts network continuity and service quality.

How does the backup power system function?

The backup power system functions by turning on with a press of the Power button for half a second, which activates the LED screen and the five AC outlets. When the unit is on, it can both charge itself and provide backup power while connected to the utility.
