

What does the battery cabinet used for testing look like

Overview

What is a battery test chamber?

Our battery test chambers are designed to test Lithium Ion batteries, lead acid, Battery Managements Systems (BMS), battery packs, modules, battery cells, and more. Our battery test chambers also offer many safety features that conform to IEC, UL and EUCAR testing standards for battery safety.

What is a battery test chamber & enclosure?

Our battery test chambers and enclosures are engineered and designed to contain thermal runaway events that cause overpressurization and explosions. They are manufactured in the USA from certified explosion-rated polycarbonate panels, easily replaceable if marred by heat or explosion. Available as mobile enclosures and walk-in safety chambers.

Why should you use a battery safety test chamber?

Battery failure can consist of leaking, rupture, fire, thermal runaway to an explosion. Battery safety testing in an environmental test chamber can help keep people and products safety. Weiss Technik provides pre-engineered battery test and battery safety chambers.

What is a battery charge & discharge test chamber?

The battery charge&discharge test chamber is a device specially designed for charging and discharging safety tests on batteries (such as lithium-ion batteries).This type of test chamber can simulate the extreme charge and discharge conditions that the battery may encounter in actual use to evaluate
