Overview

What was the Baghdad Battery used for?

The Baghdad Battery, discovered in Iraq, is often thought to be an ancient battery. However, alternative theories suggest it was not intended for electrical use. Some experts believe it may have been a storage vessel for scrolls, using the clay jar to protect fragile materials.

What is the 'Bagdad battery'?

The so-called “Bagdad battery” is probably the most famous artifact that was housed in the Iraq Museum that is still missing. I imagine that the so-called “Baghdad battery” will probably turn up at an auction house a few decades from now and get sold to some American billionaire for several million dollars.

When was the 'Baghdad Battery' created?

The so-called “Baghdad battery,” then, was most likely originally created sometime between c. 224 and c. 651 AD. This is a time period for which we have extensive written records and during which we know a relatively advanced ancient civilization (i.e. the Sassanian Empire) existed.
