

# Where is the Montenegro power signal base station

## Overview

---

Where is electricity produced in Montenegro?

The majority of electricity in Montenegro is primarily produced at the Pljevlja coal-fired Thermal Power Plant and the Perucica and Piva Hydropower Plants. The core activities of the majority state-owned Electrical Power Company of Montenegro (EPCG) are electricity generation, transmission, distribution, and supply.

How does Montenegro utilize its hydro power?

Montenegro currently uses only approximately 20 percent of its hydro power potential. To fully develop this sector, Montenegro needs to upgrade its transmission and distribution network. The most important development project in the transmission system was the construction of an underwater electricity cable to transport the power to and from Italy. Montenegro will need to continue investing in its hydro power infrastructure to increase its usage and export capabilities.

How to find a train station in Montenegro?

In Google Maps you will find the railway station you need. You will also find the Montenegrin Railway Transport online service useful, where you can find the train schedule and train ticket prices in advance. Knowing in advance tickets price and the current train schedule, travel around Montenegro will become much easier.

Where are solar power plants located in Montenegro?

Montenegro is rich in solar radiation, particularly in the southern part, especially around the cities of Bar and Ulcinj, and in the area around the capital city of Podgorica. Solar power plants are located in these areas due to the high solar radiation.
