

# **Where is the Warsaw Base Station Power Plant**

## Overview

---

Will Poland build a nuclear power plant?

Poland plans to have nuclear power from about 2036 as part of a diverse energy portfolio, moving it away from heavy dependence on coal. Poland earlier considered a stake in the planned Visaginas nuclear power plant in Lithuania. Polls show strong support among the public for the construction of the country's first nuclear power plant.

When will Poland's first nuclear power plant be built?

CC licence 2.0. Poland's first commercial nuclear power plant is scheduled for commercial operation in 2036 with first concrete in 2028 under an expected update of the country's nuclear power programme, undersecretary of state for strategic energy infrastructure Wojciech Wrochna told journalists 11 December.

Will a US consortium build Poland's first nuclear power plant?

"A U.S. consortium of highly experienced companies in the nuclear power sector is being born before our eyes today to design and build Poland's first nuclear power plant.

Will Westinghouse build a second nuclear power station in Poland?

In late 2023, Westinghouse and US-partner Bechtel jointly formed a consortium that will implement the project. Bechtel is carrying out geological studies at the Lubiatowo-Kopalino site since May. Poland has not chosen a second nuclear power station site, although several options in central Poland had been mentioned.
