Are battery energy storage systems a good investment?

Battery energy storage systems (BESS) are experiencing a remarkable upswing in Germany - and quite rightly so. They offer one of the key need that an energy system increasingly characterised by renewable energies needs: short term Flexibility. At the same time, they are becoming a new, promising asset class for investors.

How is a battery energy storage system (BESS) reimagining a business model?

It is in some ways replicating the business model it has used in the UK, Italy, Australia and Sweden so far—entering equity investment and joint development agreements with local development partners to embark on large-scale battery energy storage system (BESS) projects in strategic locations.

What is Germany's power market like?

Germany has Europe's single largest power market, representing about 20% of the total generation capacity of interconnected grids. "It's also an interesting market because it's so liquid. I think the trading volumes and the number of market participants are very high," Jimenez said, including direct interconnection with nine neighbouring countries.
