

Which is better for tourist attractions a 100kW collapsible container

Overview

What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

Should a container be collapsible vertically?

Collapsing vertically has its benefits, but strength is not one of them. Given the requirement to position containers anywhere on a vessel, the industry must be confident that a collapsible container can sustain the weight of fully laden boxes both at sea and in the port.

How many containers can a collapsecon hold?

COLLAPSECON's innovative and fully automated design allows up to 4 containers to be collapsed and combined, giving them a fully laden weight and enabling them to be transported anywhere on a ship. 1/6 COLLAPSECON collapses horizontally, ensuring the container maintains its structural rigidity in any form.

Why should you choose solar panels on shipping container?

It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability. Sensitive solar arrays can be effectively protected from storms, vandalism and all possible threats.
