What is an uninterruptible power supply?

An uninterruptible power supply provides backup power for your home appliances and other electronic devices while facing a power shutdown. The purpose of a UPS is to provide emergency power made up of a lead battery to a load when the input power supply gets disrupted. A UPS can be crucial in locations where power outages are common.

What is a ups & how does it work?

What is a UPS?

UPS stands for uninterruptible power supply, it's a device that acts as a battery backup in case of an electrical power failure. Small UPS machines for homes and offices supply enough power for a few minutes, so there's time to turn off devices properly without losing any work.

Should I buy the best ups?

These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important. You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges.
