Free shipping on all breaker orders over 60 pieces - Continental US Only. Contact 0 item(s) - \$0.00 for more information in your home shop.

What type of wire does a GFCI circuit breaker use?

For 15A and 20A circuit breakers use 14 and 12-gauge wires. The live side comes narrow blade, and the neutral wire comes with a blade-like a normal outlet. There is no breakaway fin exists since all 4 screws of GFCI do not depend on each other. GFCI outlet comes with two sets of screws as a conventional outlet has.

What is a ground fault circuit interrupter (GFCI)?

A Ground-Fault Circuit Interrupter (GFCI) is a safety device designed to protect people from electrical shock by monitoring the electrical current flowing through a circuit. It detects imbalances between the hot and neutral wires, which can indicate a ground fault where electricity is leaking out of the circuit.
