

Wholesale Iv switchgear panel in Sydney

Overview

What is low voltage switchgear?

Low Voltage Switchgear or switchboards are generally used for either kiosk substation or indoor/chamber substation applications including upgrades and new installations. Various LV switchgear types and configurations are available, they are made to utility specifications or to customer specifications for private networks.

Who makes Westinghouse low voltage switchgear?

Check out our full Westinghouse range below. Why Westinghouse?

Eltech are extremely proud to partner with Westinghouse as an authorised distributor of Westinghouse low voltage switchgear within Australia. Established in 1886, Westinghouse is internationally recognised for their deep known legacy of quality products.

What types of LV switchgear are available?

The LV switchgear is offered in Form 1 through to Form 4b, front or rear connected, in either single or double sided arrangements. It is suitable for both indoor and outdoor applications with IP ratings from IP43 up to IP56. For more information on our LV Switchgear, contact us for a brochure or data sheet.

What is a reliable low-voltage switchgear?

Reliable low-voltage switchgear is key but control and intelligence is power. Intelligent switchgear puts metering, monitoring, control and diagnostics safely at your fingertips, whether you're in the control room or across the globe. AS/NZS 61439 is the standard for low-voltage switchgear in Australia and New Zealand.
