Overview

What types of energy majors are available at the bachelor's level?

There are all kinds of energy majors available at the bachelor's level, including hard-core engineering concentrations. Use our charts to compare traditional offerings (e.g. renewable energy) with related majors (e.g. environmental science).

What can I do with a minor in Energy Science?

Lawyers, MBAs, policy analysts, and others are critical to the work being done in renewable energy. Undergraduate students from across all majors are able to secure a minor in energy science. The minor was created with support from UNL's Nebraska Center for Energy Sciences Research.

What can I do with a degree in Energy Systems Management?

Students at the college can begin their careers in the energy sector with an Associate's degree in Energy Production Technology and continue on to achieve a Bachelor's in Science degree in Energy Systems Management.

What can I do with a degree in energy?

At the graduate level, you'll discover a number of master's programs that build on undergraduate energy majors. However, you could also consider a specialist degree in an area like energy law, energy systems, or corporate leadership. Are you thinking about entering the energy workforce immediately?
