

Wind power technology quality inspection for solar container communication stations

Overview

What is the Key Laboratory of national energy wind & solar energy certification technology?

The Key Laboratory of National Energy Wind and Solar Energy Simulation and Testing Certification Technology was approved by the National Energy Administration in September 2011 and constructed by the China General Certification Center.

How does STS support solar & storage development in Asia?

STS supports solar and storage developers' procurement efforts in Asia through supplier assessment & qualification, inspection and quality control, and technical advisory services.

Why is QA/QC important for solar projects?

Implementing a comprehensive quality assurance and quality control (QA/QC) program during the pre-manufacturing and manufacturing phases is essential to the long-term success of solar projects, as it ensures that their main components meet the required quality standards to ensure long-term performance.

Who is STS solar?

STS is the first company ISO17020:2012 accredited for PV modules pre-shipment inspection, the highest qualification level of inspection bodies. Established in 2010 by a team of seasoned French solar industry veterans, STS is the result of our passion to advance sustainability progress, and our relentless drive to solve our client's challenges.
