# **Zambia solar lights recommended for home use**

## Overview

---

How many solar home systems are there in Zambia?

Zambia's Rural Electrification Authority (REA), which is tasked with electrifying rural areas, so far has undertaken 423 solar home system projects in rural communities. The first such project, completed in 2013, set up a solar mini-grid in Luapula province, supplying electricity to 480 households, a school, a health centre and the harbour.

Does Zambia need solar power?

Zambia has a high potential for solar power and the sector is growing. Right now, Zambia mainly depends on hydropower, but droughts have made this source less dependable. Combined with the increase in electricity demand, a new renewable source like solar power is desirable.

What are some applications of solar energy in Zambia?

Another applications is solar water pumping, heating and cleaning of water. The Zambian solar sector consists of several segments. Most installations generate power with the use of solar photovoltaics (PV). Examples of the usage of these systems is mainly related to electronic devices and lighting in businesses, houses and communities.

Are there solar companies in Zambia?

Yes, there are solar companies in Zambia. The solar sector hosts a variety of companies operating in several business segments, including Solar Home Systems and utility scale developers. Many of these companies have their offices located in Lusaka.
